DETAILED ACTION

Response to Amendment

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Specifically, in claims 1 and 2 the phrase "wood pulp and short fibers having a length with the range of about 3 to 20 mm" is vague and indefinite. It is not clear to the Examiner whether the fiber length limitation is related to both "wood pulp and short fibers" or not.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Canary, substantially for the reasons set forth in section 2 of Paper No. 4, together with the following additional observations.

With respect to Applicant's Response arguing that Canary fails to teach short fibers having a length within the range of about 3 to 20 mm (Response, page 2, last paragraph), the Examiner would like to point out that Specification teaches "suitable short fiber include synthetic short fiber ..., semi-synthetic short fiber such as cellulose, ..., natural short fiber ... and inorganic short fiber ... (Specification, page 5, paragraph 2), therefore it appears to the Examiner that the "short fiber" materially includes "wood

Art Unit: 1771

pulp" as well. In Examples 1, Canary teaches a wood pulp has a fiber length between 2 and 5 mm. As such, the short fiber length is anticipated by Canary.

4. Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over NITTO DENKO CORP in view of Canary, substantially for the reasons set forth in section 3 of Paper No. 4, together with the following additional observations.

Applicant's arguments filed with Amendment A (Response, page 3, paragraph 4) have been fully considered but they are not persuasive. In particular, Applicant argues the cited references individually. In response to Applicant's arguments, it is asserted that one cannot show non-obviousness by attacking references individually where the rejections are based on combinations of references.

Additionally, the teachings of Canary are again relied upon as set forth above, and the new short fiber length limitation seems to include the wood pulp fiber length as well. As such it would have been obvious to one of ordinary skill in the art to make a Ditto Denko adhesive sheet with Canary's two-layer backing, motivated by the desire to improve the release property without tearing and breaking.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 1771

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
